EDUCATION

Bachelor of Engineering, Computer Engineering

Thapar Institute of Engineering & Technology

Current GPA: 9.23/10

2024 – 2028

Patiala, Punjab, IN

Class XII (CBSE), Physics, Chemistry, Maths & Economics

Amity International School, Sector 46

Percentage: 94.2%

2022 – 2024

Gurgaon, Haryana, IN

PROJECTS

Supp – Group Music Listening App | *Python, Django, ReactJS, PostgreSQL* | [Github](#) | [Live](#)

- Built a **real-time music listening app** enabling users to create shared rooms, search SoundCloud tracks, and listen together with synchronized playback.
- Integrated **SoundCloud OAuth 2.0 authentication** and **track search APIs**, ensuring secure authorization and on-demand track selection.
- Developed a polling-based playback synchronization system to overcome SoundCloud iframe API restrictions, maintaining **playback sync within 1-3 seconds** across multiple users.
- Deployed the application to production using Render, ensuring reliable public access and validating performance by testing with **10+ concurrent users**.

Leadify – Business Card Scanning & Lead Capture App | *Python, Flask, PostgreSQL* | [Github](#) | [Live](#)

- Engineered a **scalable lead capture system** by integrating third-party cloud microservices (Google Vision API) for OCR, automating the extraction of contact metadata from high-volume image uploads.
- Implemented **regex-based parsing with 88% accuracy** to convert noisy OCR output into structured lead data stored in a PostgreSQL database.
- Released to production and currently being **used by 2 companies**, having **processed 5000+ cards**.

Sanjeevani – Health Record System for Workers | *Python, Flask, JavaScript, MySQL* | [Github](#)

- Designed a **full-stack health record system** with secure authentication and role-based access using **RESTful APIs** for Smart India Hackathon 2025.
- Embedded an AI healthcare assistant using the HuggingFace Inference API, with request-session reuse and JSON payload minimization to reduce unnecessary overhead and **improve chatbot response latency by 140 ms**.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, HTML, CSS, SQL

Frameworks: Django, Flask, React

Tools & Libraries: Git, GitHub, NumPy, Pandas, Matplotlib

Database: MySQL, PostgreSQL

Relevant Coursework: Data Structures & Algorithms (DSA), DBMS, OOP, Computer Networks, OS

ACHIEVEMENTS

- **Merit Scholarship:** Awarded tuition fee waiver for academic excellence, based on GPA merit at my university.
- **National Finalist:** Selected for the International Conference on AI for Social Impact (Ajman, UAE, 2025) to pitch an AI-driven healthcare case study.
- **District-Level Football (2nd Place):** Represented school team and secured runner-up position.
- **District-Level Chess (3rd Place):** Achieved podium finish in inter-district competition.
